SAAD ANSARI

Mumbai, India | +91 8268666622 | saadansari4678@gmail.com
Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Detail-oriented data analyst who turns raw, complex datasets into clear, actionable insights. Skilled in SQL, Excel, Power BI and Python (Pandas, NumPy), with hands-on experience building end-to-end Power BI dashboards on 120K+ cloud kitchen orders and a credit card portfolio, covering revenue, discounts, cancellations and credit risk. Comfortable using AI tools and Generative AI concepts to speed up analysis.

EDUCATION

M.H. Saboo Siddik College of Engineering, Mumbai Aug 2022 – May 2026
Bachelor of Engineering in Information Technology | CGPA: 8.59/10

TECHNICAL SKILLS

- **SQL & Databases:** Joins, Subqueries, CTEs, Window Functions (ROW_NUMBER, RANK, LAG/LEAD), Aggregations, Views; PostgreSQL, MySQL, MongoDB
- **Excel & MIS Reporting:** Pivot Tables, XLOOKUP, VLOOKUP, INDEX-MATCH, SUMIFS/COUNTIFS, Conditional Formatting, Data Validation, Power Query
- **BI & Visualization:** Power BI (DAX, Star-Schema Modeling, Time Intelligence, KPI Cards, Dashboards)
- **Python for Analysis:** Pandas, NumPy, Data Cleaning, Exploratory Data Analysis, Statistical Analysis, Trend Analysis
- **Analytics & Reporting:** KPI Tracking, Dashboard Design, Data Validation, Data Storytelling
- **Tools & Cloud:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code, AWS (Cloud Foundations)

TECHNICAL PROJECTS

Cloud Kitchen Performance Dashboard — Power BI (Internship Capstone) 2026
Power BI, DAX, Python (Pandas), Star Schema, Power Query

- Cleaned 123,141 raw order rows from a multi-brand cloud kitchen network (51 brands, 409 stores, 115 cities) in Python (Pandas): removed duplicates, fixed mixed date formats, standardized free-text coupons into 7 types, and flagged cancelled, zero-value and bulk orders.
- Designed a star schema (1 fact, 4 dimension tables) and wrote DAX measures for net revenue, AOV, discount %, cancellation rate and median fulfilment time; validated Power BI totals against Python (₹38.26M net revenue, 119,729 delivered orders).
- Built a 3-page Power BI dashboard (Executive Overview, Store & Risk, Brand & Operations) with slicers, KPI cards and a city-by-channel cancellation heatmap.
- Found that Eatsure discounts 42% vs ~23% on Zomato and Swiggy, and that cancellations vary more by channel (1.6% Swiggy, 5.7% Eatsure) than by city (1.6–3.5%); wrote a case study with recommendations and a PowerPoint insights deck.

Credit Card Portfolio Analysis — Power BI Dashboard 2026
Power BI, PostgreSQL, SQL, DAX, Power Query

- Built a 3-page Power BI report analyzing 10,000+ customer credit card records, covering transaction trends, customer segmentation, and credit risk for business decision-making.
- Designed a relational PostgreSQL data model (customer and transaction tables with foreign keys) connected directly to Power BI, and validated a simulated data refresh by appending new records in SQL.
- Developed custom DAX measures for customer acquisition cost, delinquency rate, and utilization-based risk segmentation; flagged a mismatch between card-tier acquisition cost and revenue and a counterintuitive utilization–delinquency relationship.

Diabetes Prediction System — ML-Based Web Application 2025
Python, Scikit-learn, Pandas, NumPy, Streamlit, SVM

- Built a Streamlit web application predicting diabetes risk from 8 health parameters (Pregnancies, Glucose, Blood Pressure, Skin Thickness, Insulin, BMI, Diabetes Pedigree Function, Age) using the Pima Indians Diabetes dataset.
- Cleaned and analyzed data with Pandas and NumPy, trained and evaluated an SVM classifier in Scikit-learn, and compared it against Random Forest, Decision Tree, and ANN results from prior research to guide model selection.

CERTIFICATIONS & RECOGNITION

AWS Academy Graduate – Machine Learning Foundations | AWS Academy Graduate – Cloud Foundations
Tata GenAI Powered Data Analytics (Forage) | Data Analytics Job Simulation – Deloitte (Forage)
Data Visualisation: Empowering Business with Effective Insights (Forage)
