PROFILE

Detail-oriented Information Technology graduate specializing in Data Analysis, with hands-on proficiency in SQL, Microsoft Excel, Power BI, and Python (Pandas, NumPy) for data cleaning, statistical analysis, dashboard development, and data visualization. Skilled at translating raw, complex datasets into clear, actionable business insights and KPI reports that support data-driven decision-making. Seeking an entry-level Data Analyst role to apply strong analytical, problem-solving, and reporting skills.

SKILLS

Data Analysis & Visualization: Data Analysis, Data Cleaning, Data Wrangling, Data Visualization, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Tracking, Reporting

Tools & Software: Microsoft Excel (Pivot Tables, VLOOKUP, Formulas), Power BI (Dashboards, DAX, Data Modeling, Power Query), Dashboard Development, Business Intelligence (BI)

Programming & Databases: SQL, Python, Pandas, NumPy, MySQL, PostgreSQL, Database Management

Other: Git, GitHub, Jupyter Notebook, VS Code, Problem Solving, Analytical Thinking

EDUCATION

Bachelor of Engineering in Information Technology

2022 – 2026

Mumbai University | M.H. Saboo Siddik College of Engineering

CGPA: 8.59

Secondary School Certificate (SSC)

2020

Maharashtra State Board

- Scored 88%

PROJECTS

Credit Card Portfolio Analysis — Power BI Dashboard

- Built a 3-page Power BI report analyzing 10,000+ customer credit card records, covering transaction trends, customer segmentation, and credit risk.
- Designed a relational data model in PostgreSQL with customer and transaction tables linked via foreign keys, connected directly to Power BI.
- Built custom DAX measures for per-customer acquisition cost, delinquency rate, and utilization-based risk segmentation.
- Identified a mismatch between card-tier acquisition cost and revenue, and a counterintuitive relationship between credit utilization and delinquency rate.
- Simulated a real-world data refresh pipeline by appending new records in SQL and validating end-to-end updates in Power BI.
